EcoFolders

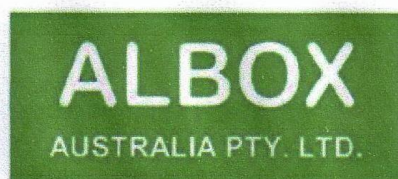

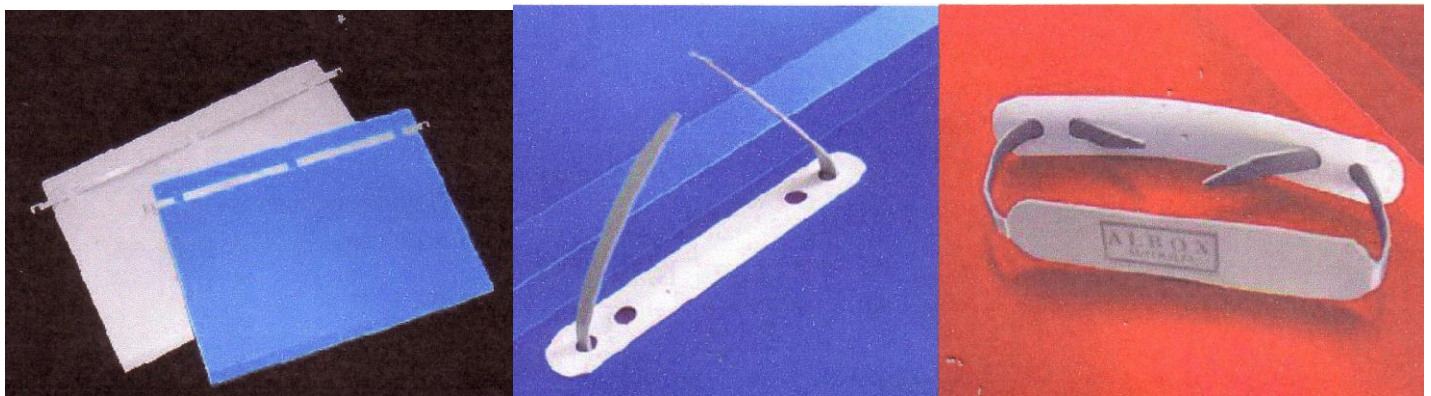

THIS NEW SUSTAINABLE FILING SYSTEM IS METAL FREE, ACID FREE, ADHESIVE FREE, AND IS OF THE HIGHEST ARCHIVAL QUALITY. IT IS EXTREMELY DURABLE AND CAN BE RECYCLED.

ALBOX ARCHIVAL QUALITY RODS CAN EASILY CONVERT THE FOLDERS INTO SUSPENSION FILES. PACKS OF THE RODS (to suit A4 or foolscap formats) ARE AVAILABLE SEPARATELY.

ALBOX LOW COST ARCHIVAL QUALITY PAPER FASTENERS ARE ALSO AVAILABLE AS A SEPARATE OPTION.

WHEN THE TIME COMES FOR ARCHIVING JUST SLIP OUT THE RODS AND THE **ECOFOLDERS FIT INTO TYPE 1 ARCHIVE BOXES.**

THE SUSPENSION RODS CAN OF COURSE BE USED AGAIN AND AGAIN

EcoBinders

The nylon ring **EcoBinders** developed by Albox are Not just another lever arch file. They are an evolution, the next generation, a new concept that will replace the old lever arch files.

The Albox EcoBinder is **SUSTAINABLE AND RECYCLABLE**

Metal ring binders will not be recycled. They will end up as landfill. That is not Sustainability.

Major recyclers in Australia have confirmed that the metal rings must be removed from the binders before they will accept the covers for recycling. Of course it is technically possible to recycle metal ring binders. An American website explains how.

- Cut or slice plastic covers from binder. Separate plastic from cardboard covers.
- Use pliers to separate binding board from ring mechanism. You may need to be creative in finding tools that work best. Folks with strong hands may be able to do this without tools.

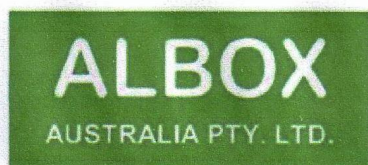

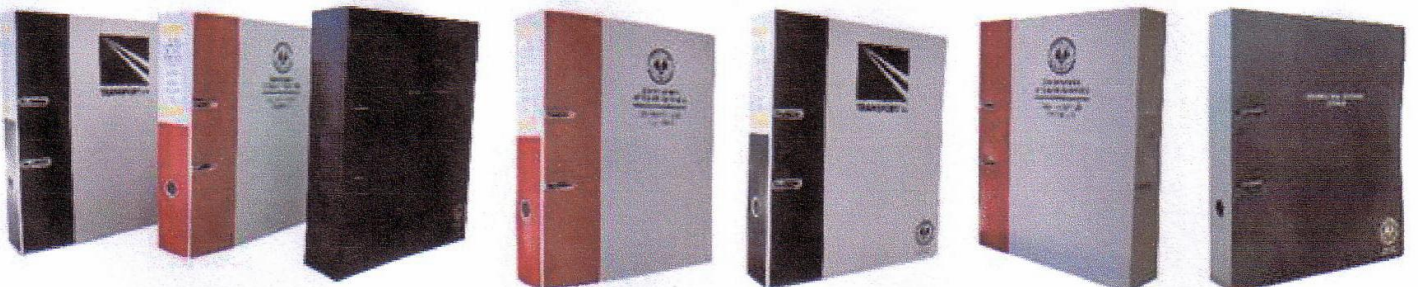

Now, in reality, how many offices actually go to that trouble?

The exclusive ALBOX designed **EcoBinder** with nylon rings.

- **Are recyclable without removing the rings from the binder**
- **Cannot misalign**
- **Will not pinch fingers**
- **Can be written on**
- **Can be archived**
- **Cannot rust**
- **Are sustainable**
- **Can be wiped clean**
- **Will stand upright on shelves**

Individualize your EcoBinder by adding your agency/department/ or business name

EcoBoxes

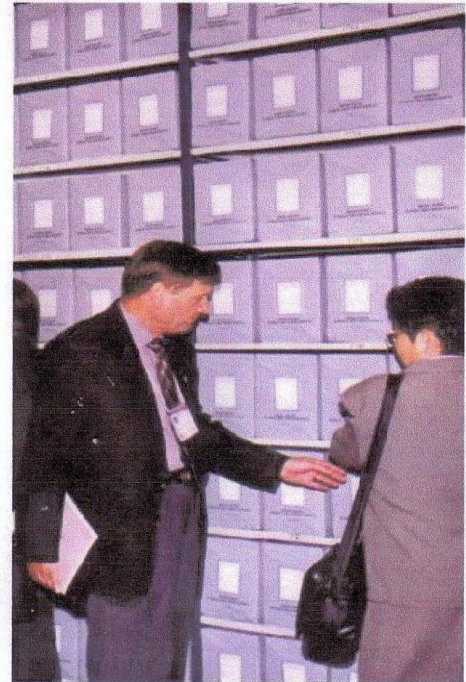

SUSTAINABLE ARCHIVE BOXES FOR PAPER RECORDS AND OTHER THINGS

The standard size archive box developed by National Archives of Australia for paper records is suitable for foolscap files. The Albox Type 1 P180 polypropylene box (of approximately similar capacity) was designed to meet both temperate and tropical climates.

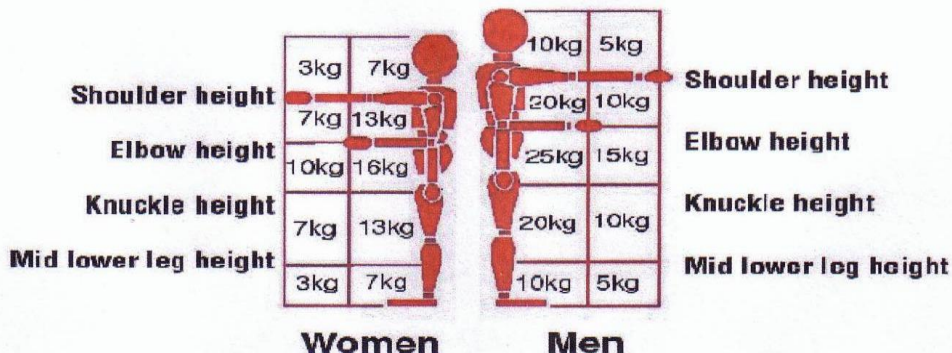

Shown above is an ALBOX Type1 P180 Polypropylene Archive Box

380 x 260 x 175mm internal measurements

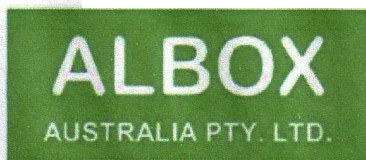

The ALBOX P180 Archive Boxes in use in the archives of the Public Records Office of Hong Kong

Albox is also aware that contemporary health and safety standards require a slightly smaller box so the Type 1 P150 was designed. The 30mm narrower width results in a filled box being approximately 1 kilogram lighter.

Albox also has A4 archive boxes and a wide range of archival storage boxes for costumes, newspapers and lots of other things.
